🚀 My Microsoft Interview Experience — Finally Sharing It!
It's been a couple of days since I joined Microsoft, and ever since, so many of you have reached out asking about my interview journey. So here's a quick recap — especially useful if you're preparing for a Cloud Solution Architect role! 💙

I was interviewed by a panel of 3 members, covering different areas:
🤖 AI & Technical Depth — Questions dug deep into AI concepts, real-world applications, and how I'd approach problem-solving with emerging technologies.
☁️ Cloud Concepts— Strong focus on cloud concepts, architecture thinking, and practical scenarios around scalability and reliability.
📄 Resume Deep-Dive — They didn't just skim my resume — every project and skill I listed was thoroughly probed. Be ready to explain the "why" and "how" behind everything you've mentioned.
🎯 Scenario-Based Questions — Real-world problem statements to test how I think on my feet and structure solutions under ambiguity.
🎭 Behavioral Questions — Classic STAR-format questions about teamwork, conflict resolution, ownership, and handling failure/success.
🤝 Soft Skills — Equal focus on communication, collaboration, and how well I could explain complex ideas simply — technical brilliance alone wasn't enough.

💡 Key Takeaways:
✅ Know your resume inside out — be ready to defend every line
✅ Brush up on core AI & Cloud fundamentals, not just buzzwords
✅ Practice structuring your thoughts for scenario-based problems
✅ Prepare real stories for behavioral questions (STAR method helps!)
✅ Sharpen your soft skills — clear communication matters as much as technical know-how
✅ Stay calm, be authentic, and let your genuine thought process shine
A few days in, and I'm already grateful for this journey and excited for what's ahead at Microsoft! 🙌

If you're preparing for a Cloud Solution Architect role or a similar interview, feel free to drop your questions in the comments — happy to help! 👇

Congratulations Rajesh on your achievement 🎉
Had a question regarding your cloud solutions architect interview. Was dsa involved in this entire interview process or the interview was majorly around cloud fundamentals

The scenario based questions are usually the hardest because there isn't one correct answer. Interviewers want to understand how you think when the answer isn't obvious.

Pavlo Khyzhniak Completely agree Mr.Pavlo. The focus is usually on how you analyze the situation, ask clarifying questions, and arrive at a solution.
